

Are your concrete form products slumping in quality? **VIBCO Vibrators. Reporting for heavy duty.**

We're the **Vibrator Guys**.™

**Product Application
Bulletin #454
Model 2P-4500
Heavy Duty
Electric Vibrator**

VIBCO'S SOLUTION

Two VIBCO 2P-4500 Heavy Duty Electric Vibrators were mounted to the sides of the concrete pipe form. The 2P-4500 has a thrust-type bearing specially designed for vertical mounts, so it was able to give the correct amount of vibration to the low slump concrete used. The specialty bearing also is designed for long-life.

VIBCO'S BENEFITS

After installing the two 2P-4500 Heavy Duty Electric Vibrators the customer received the following benefits:

- A vibrator that fit their unique needs for a heavy duty vertical mount
- Increased product quality through correct vibration
- Increased customer satisfaction and product demand

CONCRETE FORMS

“We weren't getting the quality we wanted...

We were having trouble with the existing (competitor's) vibrator on our pipe form. It didn't work well in the vertical mount position, which was a big problem. It also didn't really move the low slump concrete - which we needed in order to make product of the quality our customers expect and deserve. We knew that if we could get the vibration right, we'd be all set. I'm just glad that our dealer knew about VIBCO and their Heavy Duty Electric line of vibrators - our problem was solved!”

Plant Manager,
James K., North Carolina

Model 2P-4500 Heavy Duty Electric Vibrator

- 5000 VPM
- 5000 lbs of force
- 2 HP, 3 Phase
- 76 dB on A-Scale at 1 meter
